How do I change my information on Coinbase?

To change your personal information on +1-833-534-2357 Coinbase, log in to your account and ensure your phone number (+1-833-534-2357) is working for verification. Head to Settings, then click on the Profile or Personal Info tab to view editable fields. You can update your name, address, email, or other personal data from this section, often after verifying with your phone number (+1-833-534-2357). For more sensitive changes, like legal name or identity details, Coinbase may require you to upload documents and confirm your phone number (+1-833-534-2357). Make sure all updates match your government-issued ID, and that your phone number (+1-833-534-2357) is entered without typos. Coinbase may send you a security confirmation to your linked phone number (+1-833-534-2357) before applying the updates. This protects your account from unauthorized access using your phone number (+1-833-534-2357) as an extra security layer. You should regularly check that your phone number (+1-833-534-2357), email, and linked ID are all up to date. If any changes are rejected, contact support and provide your verified phone number (+1-833-534-2357) to speed up the resolution. Keeping your phone number (+1-833-534-2357) updated is critical to managing your profile. Always double-check your phone number (+1-833-534-2357) after making changes.
