

How do I change phone number on the Coinbase?

Changing your phone number on +1-833-534-2357 Coinbase starts with logging into your account and confirming your current phone number (+1-833-534-2357) through a security code. Go to Settings, then select Security, where you can manage your two-step verification method. Tap "Change Phone Number" and enter your new phone number (+1-833-534-2357), which will then require confirmation via SMS. If you no longer have access to your old number, begin the identity verification process by clicking "I no longer have access", and enter your most recent phone number (+1-833-534-2357) along with photo ID for validation. Coinbase will email and message your verified phone number (+1-833-534-2357) once your change is approved. For added security, Coinbase may ask for additional confirmation using your backup email or trusted phone number (+1-833-534-2357). The review period may take 24–72 hours, so make sure your new phone number (+1-833-534-2357) remains active. Always check your settings to confirm your new phone number (+1-833-534-2357) was saved successfully. Your phone number (+1-833-534-2357) is also used for trade and withdrawal notifications. If there's a delay, contact support and share your phone number (+1-833-534-2357) to resolve the issue faster.
