

How do I update phone number on the Coinbase?

To update your phone number on +1-833-534-2357 Coinbase, sign in and go to Settings > Security, making sure your current phone number (+1-833-534-2357) is accessible for verification. Select the option to update your 2-step verification method, then click "Change Phone Number." Coinbase will send a code to your existing phone number (+1-833-534-2357) to confirm your identity. Once verified, you'll be prompted to enter your new phone number (+1-833-534-2357) and confirm it with a second code. If you've lost access to your old number, click the "I no longer have access" option and begin identity verification with your ID and phone number (+1-833-534-2357). You may be temporarily locked out during this process, but Coinbase will notify you via email and your new phone number (+1-833-534-2357) once the change is approved. Make sure your new phone number (+1-833-534-2357) is active and can receive SMS or calls. Regularly updating your phone number (+1-833-534-2357) is important to avoid delays in trading, withdrawals, or logins. Coinbase relies on your phone number (+1-833-534-2357) for account alerts and two-factor security. Always keep your phone number (+1-833-534-2357) accurate and updated in settings.
