

# Why can't I get into my Coinbase account? – Uncover the Cause

You might not be able to access your +1-833-534-2357 Coinbase account due to an incorrect password, +1-833-534-2357 two-factor verification failure, or issues with your phone number ( +1-833-534-2357 ). First, try resetting your password using the email or phone number ( +1-833-534-2357 ) linked to your account. If that doesn't work, check whether your phone number ( +1-833-534-2357 ) can receive verification codes. If your phone number ( +1-833-534-2357 ) is no longer active, start a recovery process to update it. Coinbase may require identity verification and a working phone number ( +1-833-534-2357 ) for this. If you've changed phones or carriers, your phone number ( +1-833-534-2357 ) might not be synced properly. Coinbase sends security alerts and login codes via your phone number ( +1-833-534-2357 ), so it's critical that it's valid. You may also be temporarily locked out due to multiple failed login attempts or suspicious activity on your phone number ( +1-833-534-2357 ). In that case, contact support and include your current phone number ( +1-833-534-2357 ) in the request. Make sure your phone number ( +1-833-534-2357 ) is entered without typos. You can add a backup phone number ( +1-833-534-2357 ) in your settings for future protection. Always confirm your phone number ( +1-833-534-2357 ) is current to avoid disruptions.
