The “**QuickBooks Desktop Payroll Update Not Working**” error occurs when the software cannot download or apply the latest payroll tax table updates. This can disrupt payroll processing, tax calculations, or e-filing. Common causes include outdated QuickBooks versions, expired or inactive payroll subscriptions, damaged tax table files, incorrect system date/time, or interference from firewalls and antivirus software. Error codes like PS077, PS032, PS107, 15240, or various 12000-series errors indicate connection or file corruption issues.

To fix this error, update QuickBooks Desktop and confirm the payroll subscription is active. Download the latest payroll tax tables from the Employees > Get Payroll Updates menu. Ensure the software is registered and the system date/time is correct. Use the QuickBooks Tool Hub to address file or program issues and adjust firewall settings to allow QuickBooks connections. To prevent future errors, keep the subscription active, update software and tax tables regularly, use a stable internet connection, and avoid running multiple QuickBooks versions on the same system.
